Vehicles Range**

SUV/4WD/ LIGHT COMMERCIAL VEHICLES RANGE

Exide has developed a range of SUV, 4WD and light commercial batteries that suits every application and any customer budget. The range has been designed to provide genuine suitability for Australasia's harsh conditions when it comes to starting the large urban SUV, dual-purpose use for the tough rugged 4WD or strong cranking and durability for light commercial fleets

Exide Batteries has a commitment to "Power the Future" through the delivery of Enhanced performance, Extreme product life and Ultimate value to its customers.

Modern motor vehicles demand a significant increase in electrical supply, compared to previous generations of passenger vehicle technology. Along with the growing desire of consumers to explore the rugged and remote areas of the region the emphasis on product reliability is paramount. With this in mind Exide has developed batteries that provide a totally balanced performance philosophy. As part of the approach the cold cranking amps (CCA), reserved capacity (RC) and amp hours (AH) ratings have all been considered equally important to meet modern motor vehicle requirements and provide total battery performance.

The addition of Ap9 technology to the Exide range of products helps support the mechanical properties of rolled expanded grids, whereas the traditional silver additive has proven to have no impact. In extreme conditions, grid corrosion is limited by the addition of Ap9 and by a low calcium content. Additionally, when batteries endure long term storage and overcharging at high temperatures, battery life is increased with the addition of Ap9 no matter what the technology. Ap9 improves the battery recharge ability after a discharge. Exide's Extreme range, has been further enhanced with a new technology additive we call 2xT. The 2xT additive is combined with other active material components to achieve the necessary formulation to improve durability and reliability. 2xT technology in the Extreme range, will deliver longer life, hence the backing of an extended warranty. This is the top consideration of consumers when purchasing a battery. This comprehensive range provides the owner with choice of technology of a maintainable version, sealed maintenance free or AGM, with a variety of budget levels and quality and warranty options. So when you need your workhorse on the road, trust Exide.

SUV/4WD/LIGHT COMMERCIAL VEHICLES Endurance

Features

- The choice of two technologies
 1. Maintainable product technology
 2. Sealed maintenance free product technology
- Meets original equipment specifications
- Ap9 Additive
- Total balanced performance
- Up to 24 month warranty available
- Integrated carry handle

Benefits

- Choice for the consumer
 - Genuine match for the vehicle technology
 - Safe and no maintenance required
- Provides high performance in your vehicle
- Provides longer battery life
- Durability under all conditions
- Provides increased value and peace of mind
- Allows for easy installation and handling

Free Extended Warranty

Nationwide Convenience

Exide products come with a Free Extended Warranty Offer which not only rewards you with unprecedented peace of mind but most importantly, it will send you an alert when your battery is due for replacement.

There are two ways you can register your FREE EXTENDED WARRANTY

1. Look for our Quick Response Code (QR Code) on the top of the battery label. Scanning this QR Code via a compatible Smart Phone takes you to the registration page.
2. If you don't have a Smart Phone, you can record the critical details of the battery and your vehicle, then go online and register at mplbatteries.com/xwarranty. Alternatively, you can call us on our toll free number and we will do it for you.

Warranty terms and conditions are displayed on the top of the battery. To ensure optimal life of the battery, always keep your battery fully charged after use, particularly after prolonged discharge - batteries left discharged for any prolonged period of time will suffer from sulphuration which is unrecoverable causing premature failure.
