MARINE BATTERIES

MORE POWER. LONGER LIFE. ASSURED QUALITY.

MARINE BATTERIES

SuperCharge Batteries offer longer life, more power and performance with maximum durability and reliability.

With over 95 years experience, Ramcar produces SuperCharge in its world-class facilities in the Philippines.

The SeaMaster marine battery range is the leader in marine batteries. With Expanded Grid Technology (EXG), exceptional marine cranking (MCA) and energy/capacity (RC and AH), the SeaMaster gives boating enthusiasts the power needed to meet the demands of their marine application and optimal vibration resistance to meet the challenges of rough seas.

What is so special about EXG? The benefits are many. The construction of the calcium plates in super compressed rolled strips creates a dense grid pattern allowing for a more compact unit. It is less susceptible to heat corrosion and delivers more efficient cranking power. Also, as the EXG plates are shorter and have minimal gassing, there is less water loss and no acid top up is required.

Compared to ordinary gravity-cast grids, EXG calcium grids have a more compact grain structure and are inherently stronger. This makes them less prone to heat and corrosion and ensures a more efficient current conductivity and cranking power, as substantiated by the battery's superior specification ratings.

SeaMaster Gold Sealed Expanded Calcium MF

- Maintenance-free
- Vibration resistant
- Premium, extra heavy duty marine battery
- Up to 24 months warranty

SeaMaster Accessible Expanded Calcium MF

- Minimal maintenance
- Vibration resistant
- Heavy duty marine battery
- Up to 18 months warranty

SUPERCHARGE[®] **BATTERIES** MORE POWER. LONGER LIFE

TAKE CARE OF YOUR ENVIRONMENT

- Batteries drive our world and are a crucial part of today's society. When they are no longer useful, they are 98% recyclable.
- SuperCharge Batteries operates a TOTAL BATTERY MANAGEMENT program that collects and re-uses batteries, delivering an unmatched recycling program.

Help SuperCharge Batteries protect Mother Earth by leaving any used batteries wherever you see this symbol.

To find your nearest collection centre, visit our website or call SuperCharge to arrange recycling of your old battery.

SUPERCHARGE HAS A LONG-TERM VISION TO WORK WITH ITS TRADE CUSTOMERS TO CHAMPION RESPONSIBLE RECOVERY OF VEHICLE BATTERIES HERE IN AUSTRALIA.

As a firm believer in the international concepts of Extended Manufacturers Responsibility and Product Stewardship, SuperCharge is committed to establishing a national Battery Collection Centre network to achieve a true "cradle to cradle" closed loop manufacturing process for maximum resource recovery.

Better, smarter, more efficient collection and recovery means a more sustainable, environmentally friendly, long-term solution.

TRADE PARTNERSHIP TO BATTERY COLLECTION

Trade customers workshops can now join a responsible battery collection and recovery program with the following benefits:

- All brands of vehicle batteries can be collected
- Compliance to government regulation and duty of care
- Complete compliance through our responsible disposal system
- Compliance documentation available at time of collection
- Regular collection of batteries
- Provision of RCR - Responsible Care Receptacle (Conditions apply)
- Payment on returns by way of credit against current and future SuperCharge battery purchases
- Payment by EFT for all batteries collected within a month to be within the first two weeks of the following month
- An extension of service to your customers
- Encourages customers to return to your store resulting in additional sales opportunities

Please note: No batteries will be resold for reuse

BETTER, SMARTER, MORE
EFFICIENT COLLECTION
AND RECOVERY MEANS
A MORE SUSTAINABLE,
ENVIRONMENTALLY
FRIENDLY, LONG-TERM
SOLUTION.
