DUAL PURPOSE RANGE

DUAL PURPOSE RANGE

ADVANCED TECHNOLOGY DUAL PURPOSE BATTERY RANGE

Whether you are heading off for the weekend or a trip around Australia, ALCO Batteries have a solution for all your camping adventure needs. ALCO Batteries' range is packed with the latest technology meaning you can spend more time enjoying yourself and less time managing your power requirements.

The dual purpose range feature a sealed double lid with flame arrestor with a reinforced container. This strong construction means they can handle the tough conditions of travelling and camping. Every trip is different, that's where ALCO Batteries can help build a power storage solution for your particular needs.

BATTERY STRUCTURE

- 1 X-Frame Grid Technology and Grid Protection Technology
- 2 Enveloped separator for low electric resistance
- 3 Advanced centre lug technology and cast-on strap
- 4 Sealed double lid with flame arrestor
- 5 Integrated, computer-designed and reinforced container
- 6 Magic Eye Indicator (Conveniently displays state of charge)

SALES & SUPPORT

At ALCO Batteries we strive to partner with you in driving success for your business. The ALCO Batteries Connect Sales & Support Centre is available to answer any query you may have. In addition to our local team members, the ALCO Batteries Connect team can assist with all sales orders, used battery collections and product/technical inquiries.

Timely and accurate deliveries are critical in providing the best service to you customers. The team can work through the product range with you to deliver an optimal sales experience. Combining the functions of our local team members and ALCO Batteries Connect ensure you get the right product for your customer when you need it!

WARRANTY TERMS & CONDITIONS

At ALCO Batteries we are committed to total customer satisfaction by providing quality products and quality service at all times. Our batteries are warranted against any manufacturing fault for the stated period.

Warranty terms and conditions appear within this warranty card and also on the top label of your battery.

Possible causes of battery failure that are not the result of faulty manufacture:

- Incorrect or under-specified battery type fitted to car.
- Charge system problem (low or high voltage) creating an overcharge or under-charge situation. A low voltage causes the battery to sulphate whilst a high voltage will literally cook the internal components of the battery.
- Repeated deep discharge (heavy accessory loads, car phones, lighting, boat accessories, etc).
- Prolonged storage of the car or very minimal use. A battery will generally sulphate and will never recover its full state of charge.
- Electrical faults, Shorts, Excessive loads etc.
- Any battery modifications such as acid additives, lead terminal changes, or any other contaminates.
- Damage to the battery caused by the consumer or other in-car fault.

USED BATTERY COLLECTIONS

As legislation addresses the processes surrounding used batteries, ALCO Batteries ensures safe, prompt and legal transportation of used batteries. Lead based batteries are processed in our own Australian EPA compliant recycling facility. Our team are ready to book your collections today.
